EXPERIENCE

Ocado Technology 2025 – Present
VP of Engineering Practices and Application Security Barcelona

Ocado Technology provides the Ocado Smart Platform (OSP)—an end-to-end automation and e-commerce solution—to 13 international retail partners. ~2,500 technologists across 8 locations; 3,000+ patents in AI-driven logistics.

- Reporting to the CTO; part of the Engineering Productivity stream
- Identifying best engineering practices and extending them across the organisation
- Responsible for Application Security, Lean and Agile, and the SDLC
- Leading adoption of Gen AI for Software Engineering (trials, metrics, alignment, enablement)
- Leading the Application Security function (~20 people), 4 Engineering Practice Leads, an Accessibility expert and an Agile Coach
- Measuring proxies to Engineering Productivity and Developer Experience, qualitatively and quantitatively
- Working with Cloud teams and SRE to find finance optimisations in cloud consumption
- Supervising compliance and cost of applications and processes for SOC 2

Deputy CTO 2022 – 2025

- Continued leading Engineering Practices and Application Security with expanded organisational remit

Deputy Chief Engineering Officer - Engineering 2019 – 2022

- Built the Engineering Practices function from the ground up, partnering with the Deputy CEngO for Technology to promote software architecture and delivery excellence across the organisation

Engineering Manager (Assignment) 2019 – 2019

- Short-term assignment to establish an SRE function within Platform Services in Barcelona, before transitioning to the Engineering Practices stream

Catalyst (Lean and Agile Coach) 2018 – 2019

- Member of the Catalysts team, around 10 people, focusing on Culture, Effectiveness and Efficiency using Agile and Lean tools

eDreams ODIGEO 2015 – 2018
Agile Coach Barcelona

Online Travel Agency with 1,700 employees, 400+ in IT, headquartered in Barcelona.

- Led Agile transformation with a group of 10 coaches; using Kanban with support from David J. Anderson
- Rolled out to 50+ development teams; coached 14 teams (max 4 at a time)
- Applied Kanban in non-IT teams: Learning & Development and Help Desk
- Taught Kanban, Social Styles, effective feedback, visual communication, and other topics
- Supported the DevOps group continuous improvement; navigated team conflicts; coached individuals
- Re-organisational design with Dev Managers; kick-start with 80 participants (McKinsey support)
- Built a Kanban maturity visualisation tool using JavaScript / D3.js
- Conducted Impact Mapping sessions with POs; identified Value Streams; presented agile plan to C-suite

SUMMARY

Engineering leader at the intersection of technical excellence and human dynamics. Over 25 years spanning software development, architecture, Agile coaching, and senior leadership. At Ocado Technology, built and led an Engineering Practices function of ~25 people — including Application Security (~15), Engineering Practice Leads, and Agile Coaching — driving Engineering Productivity and Developer Experience across 2,500 technologists in 8 locations. Energised by sociotechnical challenges — coaching individuals, facilitating change, and designing organisations that reduce friction and improve outcomes.
