EXPERIENCE

Deputy CTO / VP of Engineering Practices and Application Security
05/2019 - 01/2022

Ocado Technology — Barcelona

- **Ocado Technology** is the division of Ocado Group responsible for developing its proprietary software and robotics. The business provides the **Ocado Smart Platform (OSP)**—an end-to-end automation and e-commerce solution—to 13 international retail partners including Kroger, Alcampo, and Bon Preu. With approximately **2,500 technologists** in 8 locations, it manages a portfolio of 3,000+ patents focusing on AI-driven logistics and automated fulfilment.
- Reporting to the CTO and part of the Engineering Productivity stream
- Identifying the best engineering practices and extending them to the wider organisation
- Responsible for **Application Security**, Lean and Agile, and the SDLC
- Leading the adoption of **Gen AI for Software Engineering** (trials, metrics, alignment, and enablement)
- Leading the Application Security function (around 20 people), team of 4 Engineering Practice Leads, an Accessibility expert and an Agile Coach
- Measuring proxies to Engineering Productivity and Developer Experience, qualitative and quantitatively
- Working with Test Engineers to align their practices and spread their knowledge
- Working with Cloud teams and SRE to find finance optimisations in cloud consumption
- Supervising compliance and cost of certain applications and processes for SOC 2

Catalyst
01/2018 - 05/2019

Ocado Technology — Barcelona

- Member of the team of Catalysts taking care of Culture, Effectiveness and Efficiency, using tools from Agile, Lean and other sources
- From March to May 2019, in an assignment as Software Development Manager of Platform Services

Agile Coach
2015 - 01/2018

eDreams ODIGEO — Barcelona

- EDreams ODIGEO is an **On-line Travel Agency**, with 1,700 employees, more than 400 in IT, and headquarters in Barcelona
- Started an Agile transformation in 2015 with a group of 10 agile coaches
- Chosen method was Kanban with direct support from its creator, David J. Anderson
- Development team has more than 50 teams with an incremental roll-out
- Coached 14 teams, maximum of 4 at a time
- Applied Kanban and Agile in non-IT teams like Learning & Development and Help Desk
- Delivered training on various topics
- Taught Kanban (once a month), Social Styles, effective feedback, visual communication, among other topics
- Navigated conflicts between team members and Coached individuals
- Supported the continuous improvement process of the DevOps group
- Re-organizational design with Development Managers
- Initiative kick-start with 80 participants, with the support of McKinsey consultants
- Set up JIRA for teams, automated tasks, and assisted with reporting.
- Built a tool to visualise team Kanban maturity using JavaScript (D3.js)
- Conducted ideation process with Impact Mapping sessions with Product Owners
- Identified Value Streams, defined workflows, presented the agile plan to the C-suite

Lecturer (part-time)
10/2014 - Present

La Salle

Consultant
01/2015 - 10/2015

Everis

- Member of the **Software Architecture** group, working for La Caixa (banking) and UOC (university)
- Working on software architecture, Continuous Delivery and API Management
- In Agile Methodologies, I was supporting one team in their processes and technical practices to be more efficient

SUMMARY

Technology leader who bridges engineering excellence and human dynamics. Combines experience in software architecture and delivery with coaching, facilitation, and organisational design. Brings clarity to complex problems, strengthens team effectiveness, and builds environments where engineers can perform at their best while maintaining strong focus on outcomes, risk, and business impact.
